PROFESSIONAL EXPERIENCE

Nikkle Tech (Technology & Business Management SaaS / ERP Software)

Software Developer | April 2023 - September 2024

Front-End Developer (6 months)

- Developed and maintained interactive, responsive user interfaces using JavaScript and jQuery.
- Collaborated with back-end developers to ensure seamless front-end/back-end communication.
- Contributed to improving user experience by optimizing UI performance and implementing new features.

Full-Stack Developer (After 6 months)

- Transitioned to a full-stack role, working with Laravel (PHP) for back-end development and MySQL for database management.
- Collaborated with cross-functional teams to enhance the Accounting, HRM, CRM, and Project Management modules of the ERP system.
- Received a salary increase and promotion due to proven performance and technical expertise.

RELEVANT PROJECTS

Co-lenders (Laravel, React.js, MySQL)

- A cash loan application system handling loan applications, approvals, document verification, and repayments.

Nambaza (WordPress, Elementor)

- Corporate website development with responsive design

Komesho IT (WordPress, Custom Theme)

- Built a custom theme from scratch, showcasing IT services
